PROFESSIONAL OBJECTIVE

I am a Computer Science student at Colorado Mesa University, and I aspire to be like a river flowing through the tech industry, carving out new channels and expanding my skillset as a full-stack developer, while working collaboratively with a team to advance an organization's digital presence through user-centered design methodology.

EDUCATION

Colorado Mesa University August 2019 – May 2023
Bachelor of Science in Computer Science
Minor in Graphic Design, Certificate in Web Development

COMPUTER SCIENCE SKILLS

JavaScript, HTML, CSS, C++, Flask, C#, Python, SQL

GRAPHIC DESIGN SKILLS

Adobe Illustrator, Photoshop, Adobe XD

EXPERIENCE

Software Engineer Intern June 2022 – December 2022

FutureWork Systems

- Revamped the front-end of client-facing dashboards to improve the navigation and end user experience by making the site responsive.
- Established trust with team to grow to operate independently on the development of the responsiveness on the front-end.
- Interfaced with key leaders within the company including C-Suite level leadership and regularly communicated requirements to an external Software Provider.

Senior Raft Guide May 2020 – Present

Arkansas River Tours, Cotopaxi, Colorado

- Led raft trips, overseeing multiple guides, guests, and boats.
- Served as a trip leader responsible for logistics planning and execution while providing an excellent guest experience.
- Managed guests through challenging situations on the river while maintaining safety guidelines, a positive attitude, and keeping morale high.

Mesa Digital Experience Club

Co-Founder and Vice President

- Provided students with a chance to interact across departments to gain experience in digital design and implementation.
- Established relationships within the nonprofit community in Mesa County to identify projects that gave students the opportunity to gain real-world experience and provide key digital services to better the nonprofits we collaborated with.

Trail Funds Freelance January 2022 – December 2022

- Won 3rd place & People's Choice Awards at Go Code Colorado out of 20 highly competitive teams from the broader community including non-academic entries.
- Developed and implemented Trail Funds' brand identity including logo creation, slide decks, wireframes and a mobile-first UI.
- Implemented cutting-edge technology as part of the front-end utilizing Geofences and location data on Swift.
- Led back-end development team of two in establishing a SQL Database with API calls following normal forms.
